

Product Description

The Kontrol IPCODER Series is a DMX512 constant voltage decoder that adopts advanced micro computer control technology to transfer standard DMX512 signal to a PWM signal. Users can choose 1 to 3 output channels with a max of 5A output to each channel, 4096 gray scales. It can be used as a DMX512 master or as a DMX decoder to connect computerized digital controllers to standard RGB fixtures.

Performance Summary

- Automatically adaptable input voltage of 12V to 24 VDC
- Inputs standard DMX512 signal
- Digital displays shows the DMX address code
- 3 channel output, 4096 gray scales each
- Logarithmic dimming
- Lamp light soft and stable without strobe or flashing
- DMX master / slave mode available
- Built-in 8 color changing modes and 10 speed scales in master mode
- Indicator displays the signal receiving status of the DMX512 signal
- Wrong wiring protection at the DMX port
- Integrated over current protection and short circuit protection
- Internal power loss memory function
- Max load current: 5A per channel x 3
- Max output power: 180W (12V) or 360W (24V)
- Output signal: Constant voltage PWM x 3
- 3 channel decoder
- Terminal block DMX512 socket
- Dimensions: 6.9" (L) x 1.8" (W) x 1.2" (H)
- Weight: 0.4 Lb
- IP20 rated, applicable for indoor applications
- Certifications: CE, FCC, RoHS
- 1 year system warranty

KONTROL IPCODER SERIES

Converts RGB signal to DMX for remote control
LED DMX LOW VOLTAGE IPCODER

Models:

- VWDIPCODEX: 180W MAX 12 VDC / 360W MAX 24 VDC

Ordering Information:

Part Number:

*Adder Applies

Ordering Example: VWDIPCODEX-DC-WT-WM

Family	Voltage	Finish	Mounting	Accessories*
VWDIPCODEX	DC - 12-24 VDC	WT - White	WM - Wall Mount	DMX Cables DMX Controllers Wireless DMX Signal Amplifiers
